

# Watch Manual

# Welcome

Thank you for choosing your high-quality FORZO watch and welcome to the FORZO family. Like you, we love receiving watches, so we know you'll want to start enjoying yours immediately.

Please read this owner's handbook before setting and wearing your FORZO watch for the first time. This is important because it will help ensure that you get years of enjoyable timekeeping from your FORZO watch.

A handwritten signature in black ink, appearing to read "Jon Quinn", is centered on a light gray rectangular background.

**Jon Quinn**

About Us

---

## The FORZO Story

Motorsport is Where passion meets engineering excellence, tuned into motion as an object of beauty comes to life.

That's the spirit in which FORZO is launched. An entirely new watch brand that unites some of the classic themes seen throughout the history of motorsport with the cutting-edge design that is a hallmark of modern automotive competition.

FORZO is a proudly British company that follows in the nation's pioneering tradition of motorsport brilliance, which has bred world-class champions and teams throughout history.

# Operating Your Watch

---

## Operating Your Watch

### Screw-down Crown \* where fitted

---

#### There are three positions for the crown:

- [1] Winding/neutral position
- [2] Date setting position
- [3] Time setting position

When you screw the crown down, the watch case locks with the crown's internal threads and gaskets to form a secure seal. The seal is vital for your watch to resist water and dust. After adjusting your watch, always make sure the crown is fully screwed down before getting the watch wet.

## Operating Your Watch

### Screw-down Crown <sup>\* where fitted</sup>

---

#### TO UNSCREW THE CROWN:

Turn it gently anti-clockwise. Because it is spring-loaded and under tension, the crown will 'jump out' slightly into its normal position when fully disengaged.

## Operating Your Watch

### Screw-down Crown \* where fitted

---

#### TO SCREW THE CROWN DOWN:

Push the crown gently towards the case.  
While holding it down turn it gently  
anti-clockwise about half a turn.

## Operating Your Watch

### Screw-down Crown <sup>\* where fitted</sup>

---

Then, still holding it down, turn the crown clockwise to engage the thread and continue turning it until it is secure.

#### CAUTION

Cross-threading or over-tightening the screw-down crown may damage your watch.

## Operating Your Watch

### Setting The Time

---

1. First, unscrew the crown.
2. Pull the crown out to position three.

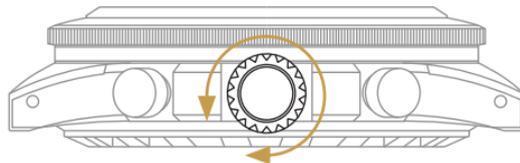

## Operating Your Watch

### Setting The Time

---

3. Turn the crown to advance the hour and minute hand.
4. Push the crown back to the normal position.
5. Screw down the crown.

## Operating Your Watch

### Winding Your Watch \* mechanical movements only

---

1. First, unscrew the crown until it 'jumps out' slightly into its normal position.

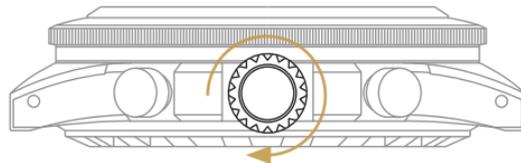

## Operating Your Watch

### Winding Your Watch \*mechanical movements only

---

2. Wind the watch by turning the crown CLOCKWISE 20-55 times.
3. Push the crown back to the normal position.
4. Screw down the crown.

## Operating Your Watch

### Setting the Date \* where fitted

---

1. First, unscrew the crown.
2. Pull the crown out to the first-click position.

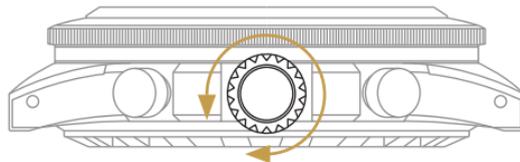

## Operating Your Watch

### Setting the Date <sup>\* where fitted</sup>

---

3. Turn the crown to adjust the date.
4. Push the crown back to the normal position.
5. Screw down the crown.

## Operating Your Watch Chronograph Operation

---

1. To start or stop the chronograph, press the Start/Stop pusher.
2. When the chronograph is stopped, it can be restarted from the same position by pressing the start/stop pusher again.

## Operating Your Watch

### Chronograph Operation

---

3. To reset the chronograph, press the reset pusher. The chronograph hand will jump back to the 12 position ('instant reset' function).

NOTE: Pressing the reset pusher during chronograph operation will not cause any problems.

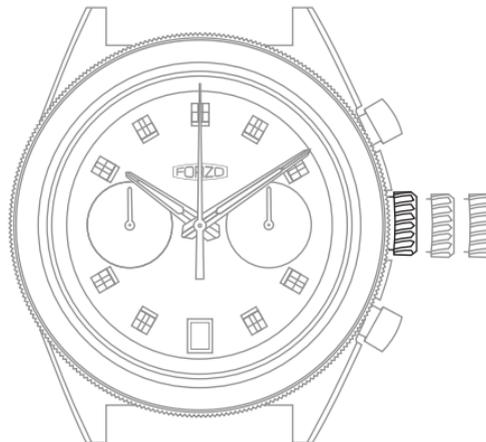

## Operating Your Watch

### GMT Function \* where fitted

---

1. Position of rest (watch running).

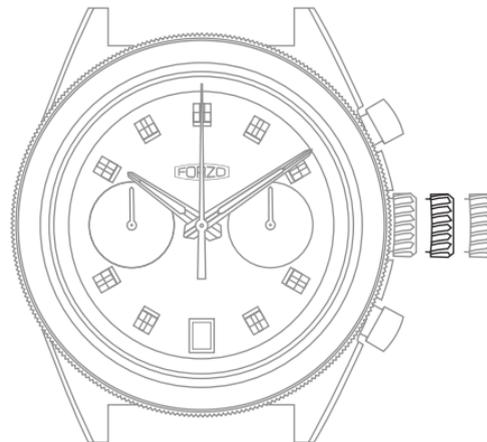

## Operating Your Watch

### GMT Function \* where fitted

---

2. Quick-change correction for **date** (model-dependant)
  - Pull the crown out to position two (watch still running).
  - Turn the crown **CLOCKWISE** until the desired date appears.
  - Push the crown back into position one.

## Operating Your Watch

### GMT Function \* where fitted

---

2. Quick-change correction for **24-hour display**
- Pull the crown out to position two (watch still running).
  - Turn the crown ANTI-CLOCKWISE until the desired time appears.
  - Push the crown back into position one.

## Operating Your Watch

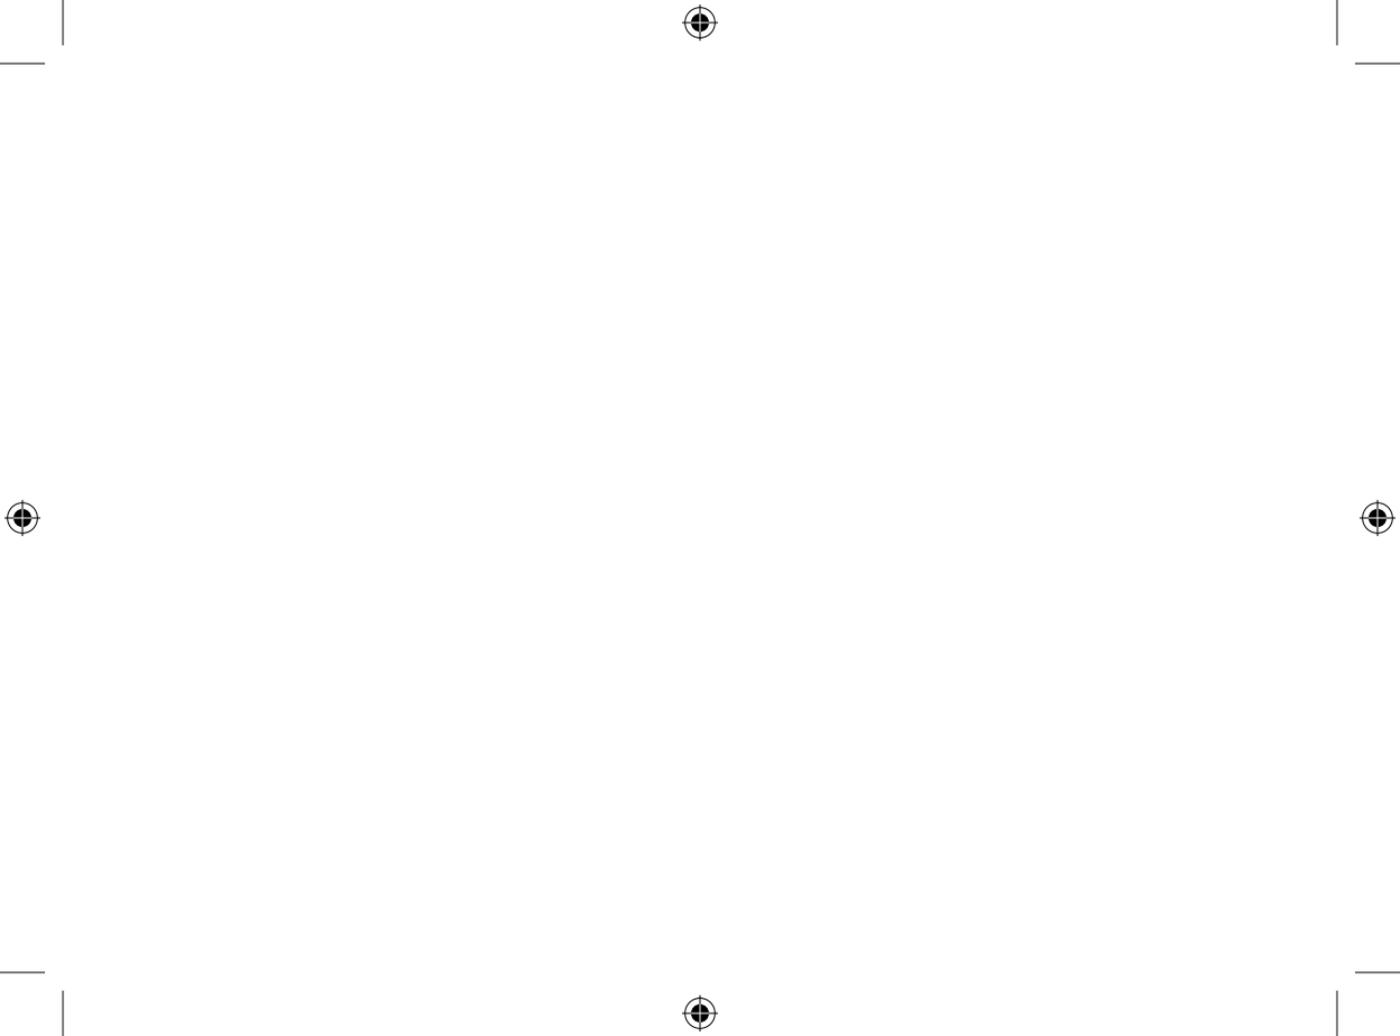

### GMT Function \* where fitted

---

#### 3. Setting the time

- Pull the crown out to position three (watch stopped).
- Turn the crown until the current time is displayed (remember the 24-hour cycle).
- Push the crown back into position one.

# *Adjusting Your Strap*

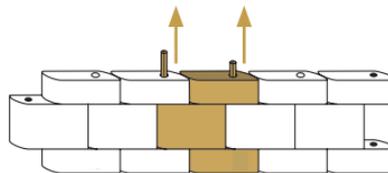

---

## Adjusting Your Strap

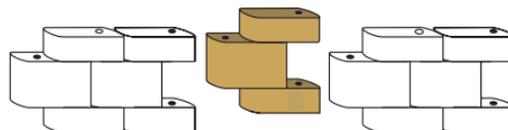

### Link Removal

---

1. Screw out the pins using an appropriately sized jeweller's screwdriver.

2. Remove link.

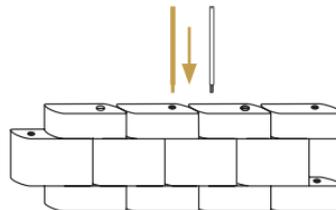

## Adjusting Your Strap

### Link Removal

---

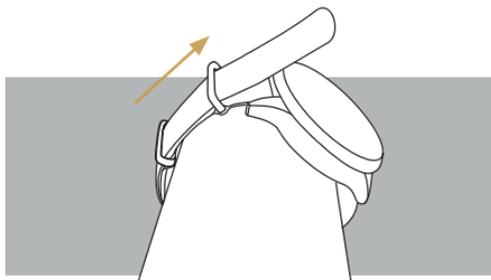

3. Make sure you insert the pin (screw thread end first) into the link and then screw down to lock it in place.

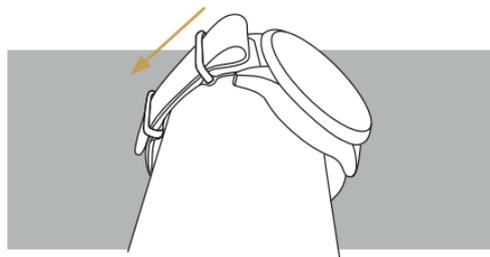

## Adjusting Your Strap

### NATO Strap

---

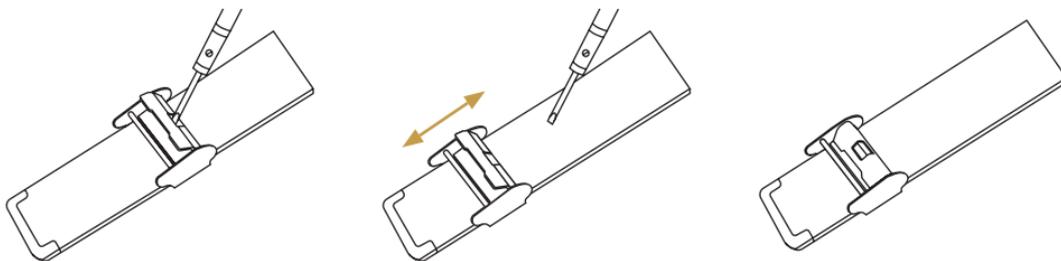

1. Pull the strap through the keepers after you've adjusted it to your wrist.

2. If the strap's too long, fold it back into the keepers.

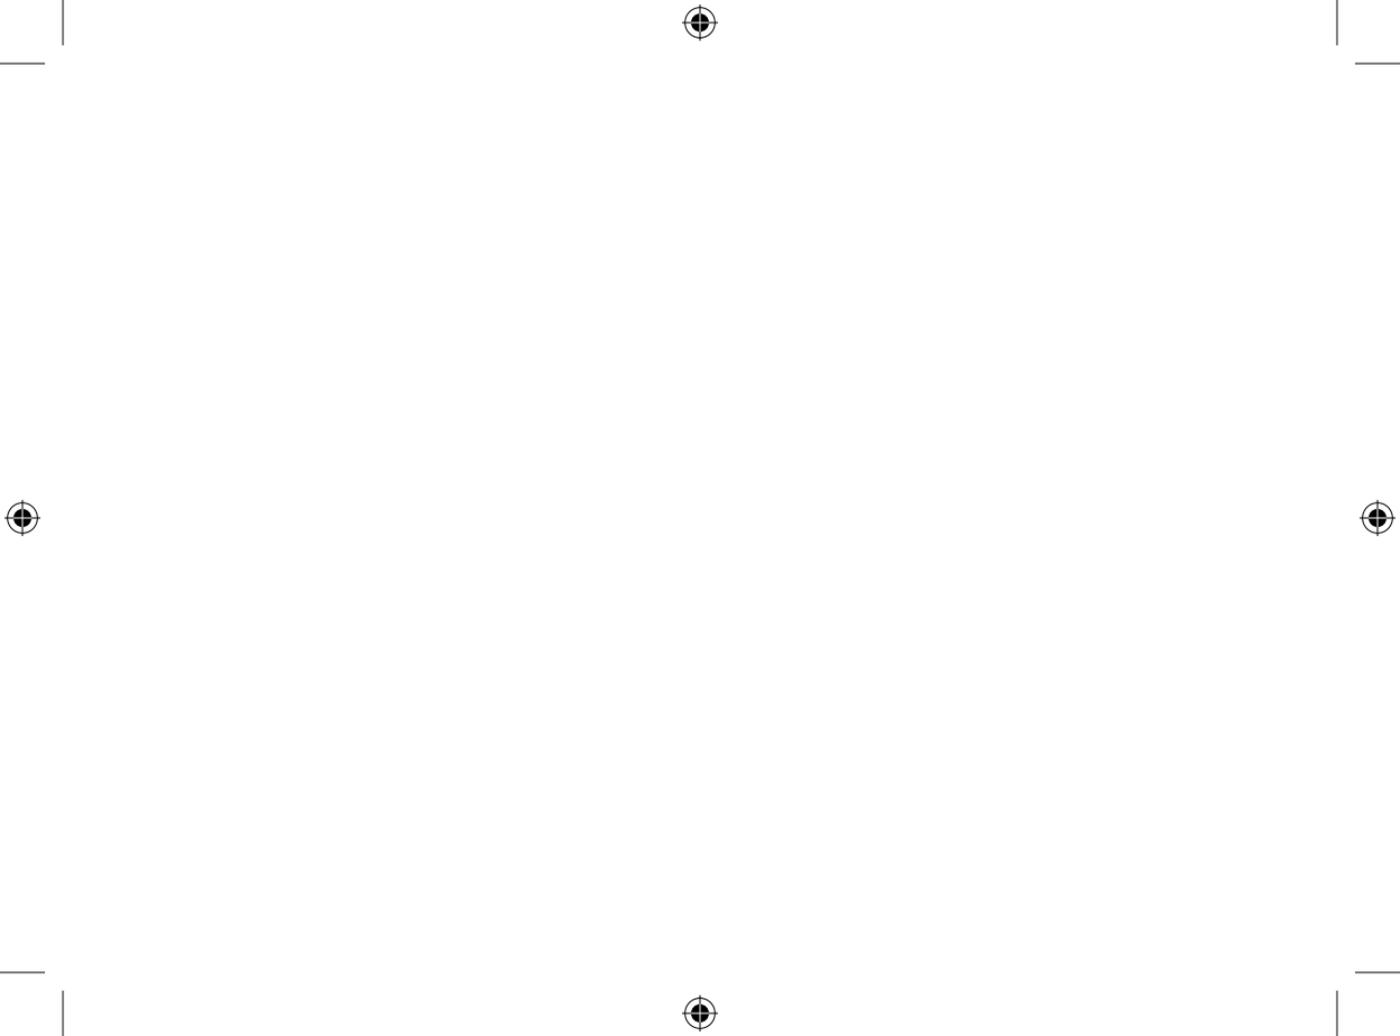

## Adjusting Your Strap Mesh Strap Adjustment

---

To loosen the clamping mechanism, use a small flathead screwdriver or equivalent tool. You can then slide the clasp up and down to find the perfect fit for your wrist.

**NOTE:** Try using a flathead jeweller's screwdriver (shown in the illustration) or our Professional Spring Bar Tool.
